Profile

I am an application and web development professional with more than 10 years of experience creating innovative solutions and showcasing product value. I posses multiple skills covering many fields including – JavaScript, CSS, HTML and ASP.net.

Experience

SENIOR APPLICATION DEVELOPER | BRAYTON PURCELL | 2/2016 TO PRESENT

Maintained and replaced existing FoxPro applications with Angular & ASP.net web applications. Developed an ecommerce using Wordpress to sell PDF documents. Automated claim submission, built high level dashboard sites and migrated version controlled projects from SVN to Git.

FRONTEND APPLICATION DEVELOPER (CONTRACT) | CLOROX | 8/2015 TO 12/2015

All projects done at Clorox including FreshStep, Glad and Hidden Valley were done using Wordpress and different mixes of both Timber and Handlebars for reusable elements on other pages and sites that needed to be responsive to both mobile and desktop viewports. The new FreshStep website implemented a loyalty and rewards feature for customers to collect points and redeem products like an online purchase. Much of the work done at Clorox was Scss and JavaScript.

SENIOR PROGRAMMING ANALYST (CONTRACT) | SONOMA COUNTY | 4/2015 TO 7/2015

Developed an ASP.net customer facing search portal using JavaScript and REST API services for looking up health inspection reports.

FRONTEND APPLICATION DEVELOPER | LITTLER MENDELSON | 4/2014 TO 4/2015

Took over development of a data entry application using ASP.net. Created a dashboard application using Highcharts, and MVC web application. Developed several CRUD applications, oversaw management of code as a lead team member, and redesigned existing applications that took a significant amount of time to load and dropped that down to 10th of seconds by optimizing stored procedures and caching data on the server.

WEB DEVELOPER | INNOVATIVE INTERFACES | 6/2013 TO 3/2014

Maintained existing hand coded CMS websites in a LAMP environment and oversaw development of their new Drupal sites. Originally hired as a contractor but was brought on as a full-time employee.

WEB DEVELOPER (CONTRACT) | JUXTA LABS | 5/2012 TO 7/2012

Hired to create the wordtag.com (which was a purely HTML, CSS, and Javascript website) for the launch of their Facebook and mobile app. After the successful completion of the project I was asked to add a music feature to their Facebook app Yearbook that was written in CodeIgniter.

WEB DEVELOPER | OWNER OF MASSIVE CAKE | 1/2009 TO 6/2013

I created Massive Cake to continue developing and designing websites for freelance. Creating and designing websites for local businesses, mostly Drupal and Wordpress sites. Small business ecommerce websites.

WEB DEVELOPER | EYECANDY MARKETING | 6/2006 TO 12/2008

As a web developer and graphic designer: I created ecommerce websites (mostly Wordpress and Drupal sites), print pieces and logos (Photoshop and Illustrator) for small local businesses. Followed and created brand guidelines and worked directly with clients for consultation and training. I also was responsible for managing email campaigns, designing and implementing database schemes (MySQL).
